ABOUT ÆDRA AND OUR DELIVERY METHOD

EXPERIENCE BEHIND THE WORK

20+ **years of combined professional construction experience**

Ædra ApS brings together professional know-how developed through subcontracting in Italy since 2006 and construction management, coordination and delivery in Denmark. This experience belongs to the team and leadership; it is not a claim about the company's incorporation date.

WHAT CLIENTS CAN EXPECT

01 CLEAR SCOPE

Materials, trade boundaries, access requirements and responsibilities are agreed before mobilisation.

02 COORDINATED EXECUTION

Resources, sequencing, site supervision and inspections follow the project programme.

03 DOCUMENTED HANDOVER

Inspection records, concealed-work photographs and nonconformity close-out are tracked.

DANSK INDUSTRI (DI)

The companies' DI membership and applicable collective agreements are stated on the basis of company information. The relevant agreement depends on the employer, occupation and assignment. DI membership is not a technical certification.

SOLUTIONS AND APPLICATIONS

FOUR DISTINCT WORK PACKAGES

Every work package is defined through a buildable scope, clear interfaces, quality checks and documented completion.

01 Precast wall panel erection

Plan delivery slots, crane access, lifting interfaces and installation using the approved lifting and temporary-stability plans.

02 Hollow-core floor slabs

Coordinate landing, bearings, temporary protection, opening positions and diaphragm connection requirements with the erection engineer.

03 Precast stairs and structural assemblies

Sequence precast stair units, landings and structural components with lifting teams and the permanent works design.

04 Grouted joints, connections and final alignment

Complete joints and connections only as prescribed by the structural engineer and product supplier.

EXECUTION AND QUALITY CONTROLS

TECHNICAL DELIVERY / CONTROL POINTS

01 Precast wall panel erection

INSTALLATION / DELIVERY METHOD

Plan delivery slots, crane access, lifting interfaces and installation using the approved lifting and temporary-stability plans.

QUALITY HOLD POINT

Verify bearing surfaces, certified lifting gear, bracing and survey checks before releasing the lifting operation.

02 Hollow-core floor slabs

INSTALLATION / DELIVERY METHOD

Coordinate landing, bearings, temporary protection, opening positions and diaphragm connection requirements with the erection engineer.

QUALITY HOLD POINT

Check bearing lengths, temporary stability, openings and acceptance before following trades.

EXECUTION AND QUALITY CONTROLS

TECHNICAL DELIVERY / CONTROL POINTS

03 Precast stairs and structural assemblies

INSTALLATION / DELIVERY METHOD

Sequence precast stair units, landings and structural components with lifting teams and the permanent works design.

QUALITY HOLD POINT

Confirm temporary restraint, anchorage, tolerances and handover of a stable assembly.

04 Grouted joints, connections and final alignment

INSTALLATION / DELIVERY METHOD

Complete joints and connections only as prescribed by the structural engineer and product supplier.

QUALITY HOLD POINT

Record material batch, joint preparation, surveyed alignment and release/curing requirements.

MATERIALS AND TRADE INTERFACES

DETAILS THAT MAKE DELIVERY RELIABLE

Confirm the design intent before installation; record concealed interfaces; release the next trade only when the relevant quality hold point is closed.

PROJECT INTERFACE CHECKLIST

01 Load-bearing support

02 Precast element

03 Temporary bracing

04 Installation / joint inspection

FOUR CRITICAL INTERFACE QUESTIONS

01 Approved substrate and loads

02 Material and system selection

03 Trade and service interfaces

04 Inspection and handover evidence

SYSTEM REQUIREMENT: Dimensions, classifications, installation approvals and permissible activities are established by the project design and the selected manufacturer's documented system.

PROGRAMME / QA-QC / HSE

A DELIVERY PROCESS THAT CAN BE VERIFIED

01 PROJECT DEFINITION

Scope boundaries, design revisions, materials and acceptance criteria.

02 PLANNING & LOGISTICS

Access, sequence, deliveries, interfaces and temporary works.

03 FIRST INSTALLATION

Inspect first-off work or a representative mock-up before repetition.

04 ROUTINE INSPECTIONS

Photographs, dimensions and records of work that will be concealed.

05 DEFECTS & FOLLOW-UP

Assign observations, corrective actions and close-out responsibilities.

06 HANDOVER

Deliver checklists, relevant product records and the agreed dossier.

Safety arrangements and competence boundaries must be agreed for the assignment. Reserved electrical and plumbing installations must be undertaken and signed off by appropriately authorised contractors; Ædra may coordinate builders' works and installation support within its agreed scope.

ÆDRA

SPECIALISATION 10 / PRECAST INSTALLATION

FROM FIRST SET-OUT TO THE FINAL INSPECTION.

YOUR PARTNER FOR A COORDINATED PACKAGE

Ædra supports complex building projects through specialised execution, site coordination and documented quality. Share your project, drawings and programme so we can clarify scope and the next step together.
