Ravik ApS

The right people for the work that matters

Recruitment and manpower solutions

Ravik is dedicated exclusively to recruitment and the supply of skilled and general manpower. We start with the client’s real staffing requirements: the trade, capabilities, location, start date and duration. We aim to make recruitment responsive and straightforward, with clear communication from candidate selection to assignment follow-up.

How we can help

- **Requirement mapping**

  Roles, experience, headcount, shifts, language and start dates.

- **Candidate sourcing**

  Search, screening, conversations and role-specific matching.

- **Flexible resourcing**

  Skilled tradespeople and general labour for short or longer assignments.

- **Follow-up**

  Customer feedback, availability updates and adjustments to requirements.

How we work together

1. Tell us the roles and timescale
2. We source and propose suitable candidates
3. Agree terms, mobilisation and follow-up

Ravik provides recruitment and manpower, not construction contract execution. Employment model, pay, workplace duties and legal responsibilities are agreed in line with Danish requirements.
