Synexa ApS

Business logistics and specialist finishes

Synexa helps businesses get materials, equipment and the right operational resources where they are needed, when they are needed. We coordinate practical solutions around the client's work and provide access to specialist Italian finishing producers.

01

Mobility and transport

Planning the movement and delivery of materials, equipment and components; coordinating team mobility, routes, delivery slots, access and unloading.

02

Dedicated temporary logistics teams

Coordinating resources for time-limited tasks such as unloading, internal movements, set-up, material handling and clearing. Staffing can be arranged with Ravik ApS where appropriate.

03

Tools, plant and equipment

Assessing requirements and sourcing or coordinating suitable handling equipment, tools and temporary work equipment, including delivery and return arrangements.

04

Italian specialist finishes

Sourcing worked marble, natural stone, tiles, ceramics and artisan-made finishes. Coordinating samples, quotations, technical information, production and delivery.

How we work with you

1. Understand the task, site, timetable and resources required • 2. Define the solution, partners, logistics and responsibilities • 3. Coordinate execution and respond to changes with the client

Synexa coordinates logistics solutions. Any staffing is supplied or arranged under a separate agreement and, where relevant, in cooperation with Ravik ApS. Equipment, transport capacity and material supply depend on the agreed scope and availability. Product documentation and applicable Danish requirements are confirmed for each order.

Tell us what you need — we will discuss a solution together.
